EDUCATION

Master of Computer Applications (MCA) | 2025 - Present

Wesley PG College, Hyderabad

Bachelor of Computer Applications (BCA) | 2022 - 2025

Osmania University, Hyderabad

Intermediate Education | 2020 - 2022

SR Educations, Hyderabad, India

Secondary School Certificate (SSC) | 2006 - 2020

St. Joseph's High School, Hyderabad, India

TECHNICAL SKILLS

Programming Languages: Python | Java | JavaScript

Technologies & Tools: SQL | Machine Learning | Deep Learning | Docker | Exploratory Data Analysis (EDA) | Excel | Power BI | Flask | Django | Pandas | NumPy | Scikit-learn | Matplotlib | Seaborn | Plotly | BeautifulSoup | Selenium | PostgreSQL | Streamlit | PyCaret

Domain Knowledge: Data Analysis | Artificial Intelligence | Natural Language Processing | Statistical Analysis | Big Data | ETL Pipelines | Model Deployment | Feature Engineering | Hyperparameter Tuning

PROFESSIONAL EXPERIENCE

Python Developer and Python AI/ML Trainer

Aim Technologies | July 2025 - Present

- Conduct hands-on training sessions in Python, Artificial Intelligence, and Machine Learning, helping students build real-world projects and develop practical skills

- Develop scalable web applications for international clients using Python frameworks including Flask and Django
- Collaborate with the Python Research and Training Center at the University of Hyderabad through official company partnership
- Design and deliver comprehensive curriculum covering Python programming, AI/ML concepts, and web development best practices

Data Analyst and AI Trainer

RG Kedia College of Commerce | February 2025 - March 2025

- Provided comprehensive training on data analysis, AI, Big Data, and Statistics to enhance student understanding of modern analytics
- Guided students through essential tools including Excel, SQL, Python, and Power BI for data-driven decision making
- Explained AI concepts and their practical applications in analytics, covering Big Data frameworks and statistical methods
- Facilitated hands-on projects and case studies, ensuring students gained practical experience and industry-relevant skills
- Mentored students to enhance their analytical thinking and prepare for careers in data science and analytics

Projects Trainee

Mallareddy Engineering College and Management Sciences | January 2025

- Assisted BTech CSE (AI & ML) and CSE (IT) students with final year projects, providing guidance on coding, debugging, and implementation
- Explained and executed machine learning algorithms, helping students build a strong foundation in AI/ML concepts
- Mentored students in project development, enhancing their problem-solving and technical skills through practical application

Machine Learning Intern

Aurigene Pharmaceutical Services Limited (Independent Subsidiary of Dr. Reddy's Laboratories) | June 2024 - September 2024

- Developed AutoML models for molecular ADMET properties prediction to support pharmaceutical research and development

- Created comprehensive visualizations to facilitate decision-making and support the selection of best-performing models
 - Performed hyperparameter tuning to enhance model accuracy and performance from 0.58 to 0.60 (benchmark: 0.65)
 - Applied regression and classification techniques to identify best-fitting models for pharmaceutical property prediction
-

PROJECTS

Automated ETL & Machine Learning Pipeline (Prototype)

- Developed a Streamlit-based automated ETL and ML pipeline handling dataset upload, preprocessing, feature engineering, model creation, and tracking
- Implemented automatic problem type detection (Regression vs Classification) and one-click feature engineering and selection
- Automated model generation and performance tracking, simplifying end-to-end ML workflows for any dataset
- Built using Python, Pandas, Scikit-learn, and ML automation techniques
- Open-source project inviting collaboration for enhancement and scalability

Deep Fake Detection System (Prototype - Deep Learning)

- Developed a prototype system to detect AI-generated deepfake images using a combination of Machine Learning, Deep Learning, and NLP techniques
- Designed to address the growing challenge of fake media identification and ensure content authenticity
- Presented at Technocrats Elite 7.0 - National Level IT Exhibition (St. Ann's College for Women, in collaboration with NilTech Pvt. Ltd., Hyderabad)
- Received cash prize for innovation and technical excellence in AI-based solution development

Loan Approval Prediction System (End-to-End ML Project)

- Built an end-to-end machine learning pipeline for predicting loan approvals using both traditional ML models and PyCaret automation
- Implemented feature engineering, feature selection, and model evaluation with rich visualizations to interpret model performance

- Showcased strong skills in data preprocessing, ML automation, and analytical visualization for real-world decision-making applications

Toyota Service Management Database (SQL Project)

- Designed a Toyota service sector database using PostgreSQL, showcasing complete ER modeling, table relationships, and database normalization
- Added dummy customer, vehicle, and service records to simulate real-world operations
- Implemented advanced SQL techniques including Views, Stored Procedures, Joins, and Aggregations for business insights and reporting
- Demonstrated strong skills in database design, data analysis, and SQL optimization

Exploratory Data Analysis (EDA) Projects

- Performed in-depth EDA on multiple real-world datasets to identify patterns, trends, and correlations
 - Utilized Pandas, NumPy, Matplotlib, Seaborn, and Plotly for data cleaning, transformation, and interactive visualization
 - Applied statistical techniques and domain-based insights to uncover hidden relationships and prepare data for machine learning workflows
 - Demonstrated strong skills in data storytelling, visualization, and analytical problem-solving
-

CERTIFICATIONS

100 Days of Code: The Complete Python Pro Bootcamp | Dr. Angela Yu (Udemy)

- Completed a comprehensive 100-day hands-on Python bootcamp covering over 100 projects
- Gained practical experience in Python programming, automation, web development (Flask), data analysis (Pandas, NumPy, Matplotlib), web scraping (BeautifulSoup, Selenium), and basic machine learning
- Strengthened skills through real-world projects including games, APIs, and web apps, demonstrating consistent coding discipline and applied problem-solving

Machine Learning Playlist | Krish Naik (YouTube) - Self-Learning

- Completed comprehensive Machine Learning playlist covering supervised and unsupervised learning, model evaluation, feature engineering, and hyperparameter tuning
- Gained hands-on experience implementing ML algorithms using Python, Scikit-learn, and Pandas, and applied them to real-world datasets

- ♦ Strengthened understanding of the complete ML workflow from data preprocessing to model deployment
-

ACHIEVEMENTS

Python Research & Development Team Member | AIMSCS, University of Hyderabad & Aim Technologies

- ♦ Selected as the youngest member of the Python R&D team, collaborating with 12 PhD experts in Machine Learning, Data Science, NLP, IoT, and Bioinformatics
- ♦ Contributing to advanced research projects leveraging Python for real-world and academic applications
- ♦ Recognized for technical excellence, innovation, and collaborative research contributions

Winner - Technocrats Elite 7.0 | National Level IT Exhibition

- ♦ Secured cash prize at Technocrats Elite 7.0, organized by St. Ann's College for Women in collaboration with NilTech Pvt. Ltd., Hyderabad
 - ♦ Developed a Deep Fake Image Detection System integrating Machine Learning, Deep Learning, and NLP techniques to identify AI-generated content
 - ♦ Recognized for technical innovation, teamwork, and problem-solving in tackling real-world AI challenges
-
